NEW PEUGEOT TRAVELLER

AN INVITATION *to travel*

The Peugeot Traveller brings to market a stylish, economical and practical full size MPV for family or business motoring needs.

A strong design, excellent road handling, the very latest in efficient engine technology and high levels of equipment combine to bring you a supreme travel experience.

The Peugeot Traveller is easy to live with and adapts to your specific needs. It's available in 3 different lengths, with a height of 1.9m high to ensure entry into car parks. With 8 seats as standard, multiple seating configurations are possible, from just 2 up to all 8 seats, depending on your needs and even in the Compact version.

A STRONG *design*

When you drive the Peugeot Traveller, it's easy to be tempted to take a longer route home or to your destination. Its modern and elegant silhouette contains a spacious interior packed with practicality.

Welcoming and confident, the Peugeot Traveller enjoys a strong road presence, boasting a verticle front grille and signature LED* and Xénon** headlamps. It exudes style and panache.

*Standard according to trim chosen. **Optional or standard according to trim chosen. Please refer to the model specification sheet for details.

* Standard according to trim chosen.
 ** Optional or standard according to trim chosen.
 *** Only MirrorLink® or Apple CarPlay™ certified apps will work when stationary and when driving, where appropriate. While driving, certain features of the app concerned may be restricted. Certain types of content, which are freely accessible on your Smartphone require a paid subscription to a certified MirrorLink® or Apple CarPlay™ application. The Mirror Screen feature operates using MirrorLink® technology for Android, BlackBerry and Windows phones that are MirrorLink® compatible, provided they have a phone subscription including internet access with their mobile operator. New smartphones will be developed with these systems over time.

JOURNEYS *calm and connected*

Aboard the Peugeot Traveller, life is dedicated to driver and passenger comfort. The footstep ensures easy access to the elevated seating position, which in turn ensures excellent driver and passenger visibility on the road.

When seated, the pure and modern design of the cabin and the high quality materials used are clearly obvious. The Heads Up instrument panel, the 7" touch screen* and 3D satellite navigation** with voice control each lend themselves to a truly

ergonomic cabin and contribute to the overall ease of driving and connected experience.

The 7" touch screen offers a Mirror Screen* function, which mirrors compatible smartphone applications onto your screen via Apple CarPlay™, MirrorLink® or Android Auto***.

EASY ACCESS *on board*

With the hands-free sliding side doors*, you can easily access the new Peugeot Traveller cabin, even with your arms full. This feature unlocks and opens the sliding side doors when you simply slide your foot under either side of the rear bumper of the vehicle. The door slides open... all you have to do is have the electronic key on your person.

Once aboard, there's no need even to pull the door handle to close. Simply press the button located on the dash and the doors will automatically open or close. To make life even easier for the driver, the New Peugeot Traveller can also be started hands-free, with the Peugeot Open & Go system.*

When parking spaces are too tight to open the boot, the new Peugeot Traveller has a clever opening tailgate rear window. Accessing shopping centres or city underground car parks will never be a problem, thanks to the 1.9m roof height limit.

*Optional or standard according to trim chosen. Please refer to the model specification sheet for details.

MORE
modularity
AND MORE
flexibility

The flexible, new Peugeot Traveller is available in 3 lengths - Compact, Standard and Long. You can also choose a seating configuration to your exact needs: the arrangement can take 2, 3, 4, 5, 6, 7 or 8 seats - you decide. Even the Compact version, at just 4.6m long, can seat up to 8 people comfortably.

With big groups in mind, the new Traveller has been designed to

cater for your passengers' needs. Numerous storage compartments are distributed throughout the cabin, providing up to 49 litres of space.

The second and third rows consist of 2/3 - 1/3 split bench seats. The two sections are completely independent of each other and slide on their rails, to easily adjust rear space or leg room.

These sliding, removable seats can be configured to allow you to carry both long loads and multiple passengers together. By folding down the front passenger seat, the new Peugeot Traveller can also carry loads up to 3.5m in length.*

To enjoy a boot volume of up to 1350 litres**, simply fold the third row of seats. By removing this row completely, the volume

increases to 1978 litres** and up to 3397 litres** when you remove the second row. Putting the seats back in position is easy. Simply return them to their rails and adjust their position, as you need.

*Standard according to trim chosen. **Volumes depend on length of vehicle chosen - Compact, Standard or Long.

ENJOY *life in bold*

The two glass roofs*, which can be covered up separately, deliver a unique, bright passenger compartment and an outstanding, panoramic sky view.

The multi-function roof integrates pleasant LED mood lighting*, while the individual reading lights add to the feeling of comfort and well-being of each passenger.

To feel even better on board, the new Peugeot Traveller has individual

vents and air conditioning with soft diffusion function in the rear*, a unique feature in the segment.

Four 12V sockets are located in the cockpit, as well as a USB port to charge all your mobile devices.

Designed for pleasure, the new Peugeot Traveller is available with so many innovative features: the rear passenger safety mirror*, picnic tables* on the front seatbacks, second row blinds*, tablet cache* are each designed to make your trip a more enjoyable experience.

*Optional or standard according to the trim chosen.

FEEL *freedom*

The new Peugeot Traveller is available with the latest generation Grip Control®* which contributes to improved handling thanks to its traction control system. You can choose between five modes - Snow, Off-Road, sand, ESP standard or Off.

Depending on the driving mode selected, the system will make sure you have the optimal grip and traction for the situation you are in.

*Optional depending on trim chosen.

PEUGEOT

and the environment

Peugeot is a leading manufacturer of low emission vehicles and more than half of its global sales are vehicles emitting less than 140g of CO₂ per km. This performance is based on proven technology: the Diesel Particulate Filter. Launched in 2000 and equipped as standard on more than 2.1 million vehicles, it reduces particle emissions by 99.99%. A self-cleaning system, it processes gases emitted from the combustion of diesel in the engine and reduces diesel particles to approximately 0.004g/km.

BlueHDi, Euro 6* diesel engines are offered on the New Peugeot Traveller: an exclusive new technology that combines a Selective Catalytic Reduction (SCR) function with the diesel particulate filter system. This BlueHDi technology drastically reduces NOx (the

combination of mono-nitrogen oxides NO and NO₂) by more than 90%, which optimises CO₂ emissions, improves fuel consumption and almost totally eliminates particle emissions (99.9%). The Peugeot Traveller has a competitively low cost of ownership, thanks in particular to its optimised fuel consumption and maintenance interval of 40,000km* or 2 years depending on the engine.

The 22.4 litre AdBlue tank has a range of 15,000km. Refilling with AdBlue is easy thanks to the external filler, positioned within the central pillar.

* 30,000km service interval for the BlueHDi 180bhp EAT6 engine

A new, flexible and efficient platform

The Peugeot Traveller is produced on Peugeot's new EMP2 modular production platform. This production floor guarantees a high level of efficiency and allows the vehicle to attain record fuel consumption in the segment, thanks to the reduced weight of components.

It also delivers a high level of durability and quality, thanks to a reinforced structure, with maximum driving enjoyment

and optimal comfort for passengers. Indeed, the make up of the new Traveller chassis and suspension has been designed to carry a maximum of 8 people plus their luggage, in absolute comfort.

With regards to safety, the Peugeot Traveller obtained the maximum 5-star rating in Euro NCAP safety testing.

TECHNOLOGY *and security*

For a safer and more convenient drive, the new Peugeot Traveller has a large number of latest-generation driving aids.*

Visopark 1 (Park Assist 180°)*

The reversing camera is automatically activated when the driver selects reverse gear. It provides a 180° aerial view of the rear zone of the vehicle and its surroundings. The rear view includes guidance lines which turn with the steering wheel. When there are obstacles behind the vehicle, the system automatically zooms in, in addition to providing other views on request.

Speed limit recognition and intelligent speed adaptation*

The multi-function camera* recognises speed limit signs and displays the relevant limit on the instrument panel or in the head up display. The detected speed limit is suggested as the value to be used in your cruise control or speed limiter, if they are activated.

Active Safety Brake*

Active Safety Brake* is a new-generation automatic emergency braking system, which is activated if a collision is about to take place. The camera and radar detect moving or stationary obstacles. If the brakes are not applied, or if the driver does not brake hard enough, the system brakes for them. It can prevent the impact if the speed is below 30kph, or reduce the result of the collision above this speed, by reducing the speed of impact.

Smart Beam Headlights*

Activated at night, the system automatically controls the switch between main beam and dipped headlamps, and vice versa, when oncoming vehicles are identified by the camera.

Adaptive Cruise Control*

This system allows you to maintain a safe distance between you and the vehicle in front, by changing the speed of your vehicle by up to 20kph. It is not an active braking system. This system works particularly well in moving and relatively heavy traffic.

Lane Departure Warning System*

An alert detects if solid or broken white road markings are crossed unintentionally, when the indicator is not activated. The audible and visual alert is particularly useful if the driver becomes drowsy or loses concentration.

Blind Spot Monitoring*

Thanks to the 4 sensors located on the front and rear bumpers of your vehicle, the blind spot monitoring system lets you know if a vehicle is present on your left or right hand side blind spot, during your journey. A light appears in the door mirror as a warning.

Head-Up Display*

The Head-Up Display projects the information essential to driving onto a retractable screen located in the driver's field of vision: speed, cruise control or speed limiter settings, etc. All the information you need is right in front of your eyes, ensuring a safer driving experience.

Airbags

The Peugeot Traveller is equipped with airbags as follows:

- 2 front airbags to protect the head and chest of the driver and the passenger in the event of a frontal impact
- 2 curtain airbags* to protect passengers in all three rows, in the case of a side impact

*Optional or standard according to trim chosen. Please refer to the model specification sheet for full equipment details.
